Report of the Superintendent

*To the School Board and the Citizens of the School District
of Columbia*

FOREWORD

If the age old saying "the proof is in the pudding" still holds true, and it is strongly suspected that it would be extremely difficult to come up with anything to the contrary, then it would seem to follow that possibly a brief look at two of the outcomes attributed to our overall educational effort provide opportunity for comparison. The two areas we have particularly in mind, the technological and the sociological, in so far as performance is concerned, furnish perhaps as contrasting pictures as could be chosen. Certainly, from the standpoint of the utilization of know how in the former, no matter in what direction we may look, as compared to that of a decade ago, our accomplishments have been truly phenomenal. We are told that, so tremendous has been the acceleration of the progress made during this short period of time, what has been accomplished exceeds even that of the whole previous century. And now to actually witness what is taking place in our present day space program is almost beyond comprehension.

To turn now from the first of the two pictures we are to examine to look at the second, we are struck with the contrast of the hue between the two. This second one, which has to do with how we get along with our fellowmen, does not have the luster and the definiteness that stands out so eminently in the first. It jolts us into a greater awareness of that which every single one of us very well knows, whether or not admitted, that it is one matter to determine what things can do and in getting them to do it, and that it is quite a different matter to determine what we can or should do and in getting us to do it. The distance across this wide gap between really knowing and actually doing, considered either individually or collectively, has been narrowed little if any down through the many years. How to

bring these two, call them sides if you will, nearer together is still our greatest unsolved problem, and should constitute our major educational objective. The big question is, will we acknowledge our responsibility, and face up to the challenge?

GENERAL

With all schools in the district now closed, which means that a number of those customarily made have been deleted, the number of brief supplementary reports is confined to the following two:

1. *Tuition:*

As would be known, with all elementary pupils enrolled in schools outside the district, the number of tuition pupils in Grades 1-8 has increased perceptibly over that of previous years. At the time of this writing it is 83 in comparison to 57 last year and to 51, 45, 35, 39 and 30 during the respective five preceding years. The number enrolled in high school outside the district is 37 as compared to 35 a year ago, and to 25, 29, 25, 28, and 20 for the respective five preceding years to last year.

2. *Budget:*

The School Board's budget for 1966-67 is \$52,152.-00 in comparison to \$51,170.00 for the current year. This amount is decreased by an estimated income of \$21,600.00 which leaves a balance of \$30,552.00 to be raised by taxes by the town. For the most part, the increase in the budget for next year is explained, as will be noted in the budget breakdown found on subsequent pages in this report, by provision for greater overall tuition costs.

CONCLUSION

As has been done many times previously, I wish to express my sincere and deep appreciation to the members of the School Board, parents, teachers, and citizens for all the assistance and cooperation received as we have worked together down through the years to provide and maintain high standards in our schools.

Respectfully submitted,

ERNEST B. DANA
